

The new T_EX Live installer

Norbert Preining
Reinhard Kotucha
Siep Kroonenberg

What is new?

- New packaging infrastructure
- Unified installer: Windows/Unix, text mode/graphics mode
- Separate maintenance tool `tlmgr`
- **Network installation!**
- LuaTeX/TeXLua for some scripting tasks
- Better compression with lzma
- No cd edition

Packaging infrastructure

- Better separation of static and generated content
- More streamlined updating from CTAN
- No more xml
- Can specify install-time actions (formats, mapfiles)

Installer demo

Windows

- Older Windows versions no longer supported
- Hidden Perl and Ghostscript
- Uninstaller via add/remove programs

TImgr: maintenance tool

- To be presented by Norbert
