TECHNOLOGY

wordpress.com

- easy to use (for editors and authors);
- HTML and visual editor;
- many editors and authors can work with the page;
- blog-like features suitable for the project:
 - an embedded search engine,
 - tagging and categories
 - commenting options
- easy to use backup and restore functionalities;
- it is mobile devices friendly out of the box.

Just DON'T
& yes evolution!!
the cell requires over
1,000 processes to stay
alive - if one is core -
no life - all 1,000+
must evolve
time = 1000+

Sorry, but the Cambrian
Explosion basically kills the
theory. Not to mention the
fossil record, or the lack
feasibility of practical
evolution even in simple-cell
organisms. The odds are
astronomical against the classica
theory of evolution. The odds are
trillions to one.

- When it comes to the packages selection we do not impose any restrictions.
- We usually rely on our authors' interests while choosing a package to describe.
- This is the reason why *Pakietomat* has such a wide range of packages coverage without focusing on one particular subject
 - e.g. you will find description of *qtree* and *forest* packages for drawing trees,
 - *datatool* package for importing data from CSV files, and also
 - *cuisine* for typesetting recipes.
