As you know. . . One volume for BachTeX 2018, 2019,
2023, 2024.

The proceedings are ready!

As you know. . . One volume for BachTeX 2018, 2019, 2023, 2024.

For each year \implies as before: complete articles then abstracts when complete papers are not provided.

Going on...

I can...

or people from GUST staff can use my programs.

A manual is missing—should be updated, in fact—

Going on...

I can...

or people from GUST staff can use my programs.

A manual is missing—should be updated, in fact—I plan to do that next summer.

The best, in my opinion

Post-proceedings, after the conference.

The best, in my opinion

Post-proceedings, after the conference.
Not hurried just before the conference.

The best, in my opinion

Post-proceedings, after the conference.

Not hurried just before the conference. (Let us be honest: for many of us, these articles are not our main occupation.)

The best, in my opinion

Post-proceedings, after the conference.

Not hurried just before the conference. (Let us be honest: for many of us, these articles are not our main occupation.)

You can integrate some points revealed by *questions* and *comments*.

2 abstracts.

Change

Not about your text, I swear it,

Not about your text, I swear it, but I sometimes removed some *underfull/overfull hboxes* by means of the microtype package or local redefinitions of *letter/word spacing*.

Not about your text, I swear it, but I sometimes removed some *underfull/overfull hboxes* by means of the microtype package or local redefinitions of *letter/word spacing*. I sometimes reworked figure placement, too.

Not about your text, I swear it, but I sometimes removed some *underfull/overfull hboxes* by means of the microtype package or local redefinitions of *letter/word spacing*.

I sometimes reworked figure placement, too.

In case of change, I contacted authors for approval.

If you would like to write in Polish

Please pay attention to *unbreakable space characters*! I know that one-letter words are to be followed by an unbreakable space, but I do not master subtleties.

If you would like to write in Polish

Please pay attention to *unbreakable space characters*! I know that one-letter words are to be followed by an unbreakable space, but I do not master subtleties.

Likewise, pay attention to *quotation markers*!

If you would like to write in Polish

Please pay attention to *unbreakable space characters*! I know that one-letter words are to be followed by an unbreakable space, but I do not master subtleties.

Likewise, pay attention to *quotation markers*!

Remark: with the babel package, the options polish and polish-compatible may not result in the same hyphenation places.

All are accepted, provided that the final result is a PDF file.

All are accepted, provided that the final result is a PDF file.
The best encoding is utf8, even if latin1 and latin2 may
be accepted.

At the end...

Even if we can work on the layout more easily than with Microsoft Word, some points should be processed at last: e.g., hyphenation problems or figure placement.

At the end...

Even if we can work on the layout more easily than with Microsoft Word, some points should be processed at last: e.g., hyphenation problems or figure placement. I need some advice about such finition touches in ConTeXt.

Conclusion

We can do even better. Many things are open.
